

Bristol YMCA Cricket Club – Guidelines on Changing Rooms and Showering

Children and adults do not use the same changing facilities at the same time. Best practice principles which have been adopted by our club, wherever possible, are as follows:

- Adults must not change, or shower, at the same time using the same facility as children - if the same changing room is used then they must have different times
- If adults and children need to share a changing facility, they must do so at different times.
- Mixed gender teams must have access to separate male and female changing rooms
- Due to the risks of inappropriate photography or filming, mobile phones must not be used in changing rooms. If children are uncomfortable changing or showering at the club, no pressure should be placed on them to do so. Suggest instead that they may change and shower at home.
